

# Mendocino County Employees' Retirement Association (MCERA)

Governmental Accounting Standards (GAS) 68  
Actuarial Valuation Based on June 30, 2019  
Measurement Date for Employer Reporting  
as of June 30, 2020

This report has been prepared at the request of the Board of Retirement to assist the sponsors of the Fund in preparing their financial report for their liabilities associated with the MCERA pension plan. This valuation report may not otherwise be copied or reproduced in any form without the consent of the Board of Retirement and may only be provided to other parties in its entirety, unless expressly authorized by Segal. The measurements shown in this actuarial valuation may not be applicable for other purposes.

July 21, 2020

*Board of Retirement  
Mendocino County Employees' Retirement Association  
625-B Kings Court  
Ukiah, CA 95482-5027*

*Dear Board Members:*

*We are pleased to submit this Governmental Accounting Standards (GAS) 68 Actuarial Valuation based on a June 30, 2019 measurement date for employer reporting as of June 30, 2020. It contains various information that will need to be disclosed in order for MCERA employers to comply with GAS 68.*

*This report was prepared in accordance with generally accepted actuarial principles and practices at the request of the Board to assist the sponsors in preparing their financial report for their liabilities associated with the MCERA pension plan. The census and financial information on which our calculations were based was provided by MCERA. That assistance is gratefully acknowledged.*

*The measurements shown in this actuarial valuation may not be applicable for other purposes. Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; and changes in plan provisions or applicable law.*

*The actuarial calculations were completed under the supervision of Andy Yeung, ASA, MAAA, Enrolled Actuary. We are members of the American Academy of Actuaries and we meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion herein. To the best of our knowledge, the information supplied in the actuarial valuation is complete and accurate. Further, in our opinion, the assumptions as approved by the Board are reasonably related to the experience of and expectations for the Retirement Association.*

*We look forward to reviewing this report with you and to answering any questions.*

*Sincerely,*

*Segal*

## **SECTION 1: Valuation Summary for the Mendocino County Employees' Retirement Association**

---

### **Purpose**

This report has been prepared by Segal to present certain disclosure information required by Governmental Accounting Standards (GAS) 68 for employer reporting as of June 30, 2020. The results used in preparing this GAS 68 report are comparable to those used in preparing the Governmental Accounting Standards (GAS) 67 report for the plan based on a reporting date and a measurement date as of June 30, 2019. This valuation is based on:

- The benefit provisions of the Retirement Association, as administered by the Board of Retirement;
- The characteristics of covered active members, inactive vested members, and retired members and beneficiaries as of June 30, 2019, provided by the Retirement Association;
- The assets of the Plan as of June 30, 2019, provided by the Retirement Association;
- Economic assumptions regarding future salary increases and investment earnings adopted by the Board for the June 30, 2019 valuation; and
- Other actuarial assumptions, regarding employee terminations, retirement, death, etc. adopted by the Board for the June 30, 2019 valuation.

### **General Observations on GAS 68 Actuarial Valuation**

The following points should be considered when reviewing this GAS 68 report:

- The Governmental Accounting Standards Board (GASB) rules only define pension liability and expense for financial reporting purposes, and do not apply to contribution amounts for pension funding purposes. Employers and plans still develop and adopt funding policies under current practices.
- When measuring pension liability, GASB uses the same actuarial cost method (Entry Age) and the same type of discount rate (expected return on assets) as MCERA uses for funding. This means that the Total Pension Liability (TPL) measure for financial reporting shown in this report is determined on generally the same basis as MCERA's Actuarial Accrued Liability (AAL) measure for funding. We note that the same is generally true for the Normal Cost component of the annual plan cost for funding and financial reporting.
- The Net Pension Liability (NPL) is equal to the difference between the TPL and the Plan's Fiduciary Net Position (plan assets). The Plan's Fiduciary Net Position is equal to the market value of assets and therefore, the NPL measure is very similar to the Unfunded Actuarial Accrued Liability (UAAL) calculated on a market value basis. The NPL reflects all investment gains and losses as of the measurement date. This is different from the UAAL calculated on an actuarial value of assets basis in the funding valuation that reflects investment gains and losses over a five-year period.

## SECTION 1: Valuation Summary for the Mendocino County Employees' Retirement Association

---

- For this report, the reporting dates for the employer are June 30, 2020 and 2019. The NPL was measured as of June 30, 2019 and 2018 and determined based upon the results of the actuarial valuations as of June 30, 2019 and 2018, respectively. The Plan's Fiduciary Net Position and the TPL were valued as of the measurement dates. Consistent with the provisions of GAS 68, the assets and liabilities measured as of June 30, 2019 and 2018 are not adjusted or rolled forward to the June 30, 2020 and 2019 reporting dates, respectively.

### Significant Issues in Valuation Year

The following key findings were the result of this actuarial valuation:

- The NPL increased from \$197.5 million as of June 30, 2018 to \$214.8 million as of June 30, 2019. This was mainly due to (a) higher than expected salary increases for continuing active members (that loss was about \$5.3 million), and (b) the return on the market value of assets of 3.86% during 2018/2019 that was less than the assumption of 7.00% used in the June 30, 2018 valuation (that loss was about \$16.2 million).
- There was an increase in the total employer pension expense from \$28.1 million calculated last year to \$40.1 million calculated this year. The primary cause of the increase was due to the full recognition of the remaining \$7.8 million in credit from an asset gain that was identified in the June 30, 2014 valuation in developing last year's pension expense.
- The discount rate used to determine the TPL and NPL as of June 30, 2019 and 2018 was 7.00%, following the same assumption used by the Association in the pension funding valuations as of the same dates. The detailed calculations used in the derivation of the discount rate of 7.00% used in the calculation of the TPL and NPL as of June 30, 2019 can be found in Appendix A of Section 3. Various other information that is required to be disclosed can be found throughout Exhibits 1 through 13 in Section 2.
- The Safety and Probation membership classes have only one employer (the County), so all of the NPL for Safety and Probation is allocated to the County.

For the General membership class, the NPLs as of June 30, 2018 and June 30, 2019 are allocated based on the actual employer contributions within that class made during 2017/2018 and 2018/2019, respectively. The steps we used for the allocation are as follows:

- First calculate the ratio of the employer's contributions to the total contributions for the membership class.
- This ratio is multiplied by the NPL for the membership class to determine the employer's proportionate share of the NPL for the membership class.

If the employer is in several membership classes, the employer's total allocated NPL is the sum of its allocated NPL from each membership class. The proportionate share of the total plan NPL is then the ratio of the employer's total allocated NPL to the total NPL of all employers.

The NPL allocation can be found in Exhibit 7 in Section 2.

## SECTION 1: Valuation Summary for the Mendocino County Employees' Retirement Association

---

- When reviewing the allocation of the NPL to the General employers, with respect to the Courts we note that the proportion of actual employer contributions within the General membership has steadily declined in recent years. For example, between June 30, 2018 and 2019, the Courts' employer contribution proportion has decreased from 4.912% to 4.725%. The result is a reduced proportional share of the NPL, and for June 30, 2019, as was the case for last year, a negative Pension Expense as shown later in Exhibit 8.
- The Russian River Cemetery District and the Mendocino County Courts had deferred inflows of resources due to net excess of actual over projected earnings on pension plan investments as of the prior June 30, 2018 measurement date. However, those results changed to deferred outflows of resources for those two employers as of the current June 30, 2019 measurement date after the total plan market value asset loss during Fiscal Year 2018/2019, due in large part to a smaller portion of the total market value of assets allocated to the special districts (compared to the prior year), based on financial information provided by MCERA. Deferred outflows of resources and deferred inflows of resources are shown in Exhibit 9.
- Results shown in this report exclude any employer contributions made after the measurement date of June 30, 2019. The employer should consult with their auditor to determine the deferred outflow that should be created for these contributions.

<b>Summary of Key Valuation Results</b>		
<b>Reporting Date for Employer under GAS 68</b>	<b>6/30/2020<sup>(1)</sup></b>	<b>6/30/2019<sup>(2)</sup></b>
<b>Measurement Date for Employer under GAS 68</b>	<b>6/30/2019</b>	<b>6/30/2018</b>
<b>Disclosure elements for fiscal year ending June 30:</b>		
1. Service cost <sup>(3)</sup>	\$13,422,284	\$12,576,536
2. Total Pension Liability	747,481,137	717,925,244
3. Plan's Fiduciary Net Position	532,727,019	520,429,961
4. Net Pension Liability	214,754,118	197,495,283
5. Pension expense	40,085,911	28,076,156
<b>Schedule of contributions for fiscal year ending June 30:</b>		
6. Actuarially determined contributions	\$23,702,064	\$20,430,644
7. Actual contributions	23,702,064	20,430,644
8. Contribution deficiency / (excess) (6) – (7)	0	0
<b>Demographic data for plan year ending June 30:</b>		
9. Number of retired members and beneficiaries	1,552	1,490
10. Number of vested terminated members <sup>(4)</sup>	515	497
11. Number of active members	1,151	1,162
<b>Key assumptions as of June 30:</b>		
12. Investment rate of return	7.00%	7.00%
13. Inflation rate	3.00%	3.00%
14. Projected salary increases <sup>(5)</sup>	Ranges from 8.50% to 4.00% based on years of service	Ranges from 8.50% to 4.00% based on years of service

<sup>(1)</sup> The reporting date and measurement date for the Plan are June 30, 2019.

<sup>(2)</sup> The reporting date and measurement date for the Plan are June 30, 2018.

<sup>(3)</sup> The service cost is based on the previous year's valuation, meaning the 2019 and 2018 values are based on the valuations as of June 30, 2018 and June 30, 2017, respectively. Both service costs have been calculated using the assumptions shown in the June 30, 2018 measurement date column, as there had been no changes in the actuarial assumptions between the June 30, 2017 and June 30, 2018 valuations.

<sup>(4)</sup> Includes terminated members due a refund of employee contributions.

<sup>(5)</sup> Includes inflation at 3.00% plus real across the board salary increase of 0.50% plus merit and promotion increases that vary by service.

## SECTION 1: Valuation Summary for the Mendocino County Employees' Retirement Association

---

### Important Information about Actuarial Valuations

An actuarial valuation is a budgeting tool with respect to the financing of future projected obligations of a pension plan. It is an estimated forecast – the actual long-term cost of the plan will be determined by the actual benefits and expenses paid and the actual investment experience of the plan.

In order to prepare an actuarial valuation, Segal relies on a number of input items. These include:

- **Plan of benefits** Plan provisions define the rules that will be used to determine benefit payments, and those rules, or the interpretation of them, may change over time. Even where they appear precise, outside factors may change how they operate. It is important to keep Segal informed with respect to plan provisions and administrative procedures, and to review the plan summary in this report (as well as the plan summary included in our funding valuation report) to confirm that Segal has correctly interpreted the plan of benefits.
- **Participant data** An actuarial valuation for a plan is based on data provided to the actuary by the Association. Segal does not audit such data for completeness or accuracy, other than reviewing it for obvious inconsistencies compared to prior data and other information that appears unreasonable. It is important for Segal to receive the best possible data and to be informed about any known incomplete or inaccurate data.
- **Assets** This valuation is based on the market value of assets as of the valuation date, as provided by the Association. The Association uses an “actuarial value of assets” that differs from market value to gradually reflect year-to-year changes in the market value of assets in determining contribution requirements.
- **Actuarial assumptions** In preparing an actuarial valuation, Segal projects the benefits to be paid to existing plan participants for the rest of their lives and the lives of their beneficiaries. This projection requires actuarial assumptions as to the probability of death, disability, termination, and retirement of each participant for each year. In addition, the benefits projected to be paid for each of those events in each future year reflect actuarial assumptions as to salary increases and cost-of-living adjustments. The projected benefits are then discounted to a present value, based on the assumed rate of return that is expected to be achieved on the plan’s assets. There is a reasonable range for each assumption used in the projection and the results may vary materially based on which assumptions are selected. It is important for any user of an actuarial valuation to understand this concept. Actuarial assumptions are periodically reviewed to ensure that future valuations reflect emerging plan experience. While future changes in actuarial assumptions may have a significant impact on the reported results, that does not mean that the previous assumptions were unreasonable.

## SECTION 1: Valuation Summary for the Mendocino County Employees' Retirement Association

---

The user of Segal's actuarial valuation (or other actuarial calculations) should keep the following in mind:

- The actuarial valuation is prepared at the request of the Board to assist the sponsors of the Fund in preparing items related to the pension plan in their financial reports. Segal is not responsible for the use or misuse of its report, particularly by any other party.
- An actuarial valuation is a measurement of the plan's assets and liabilities at a specific date. Accordingly, except where otherwise noted, Segal did not perform an analysis of the potential range of future financial measures. The actual long-term cost of the plan will be determined by the actual benefits and expenses paid and the actual investment experience of the plan.
- If the Association is aware of any event or trend that was not considered in this valuation that may materially change the results of the valuation, Segal should be advised, so that we can evaluate it.
- Segal does not provide investment, legal, accounting, or tax advice. Segal's valuation is based on our understanding of applicable guidance in these areas and of the plan's provisions, but they may be subject to alternative interpretations. The Board should look to their other advisors for expertise in these areas.

As Segal has no discretionary authority with respect to the management or assets of the Plan, it is not a fiduciary in its capacity as actuaries and consultants with respect to the Retirement Association.

## SECTION 2: GAS 68 Information for the Mendocino County Employees' Retirement Association

---

### EXHIBIT 1

#### General Information – “Financial Statements”, Note Disclosures and Required Supplementary Information for a Cost-Sharing Pension Plan

---

##### Plan Description

*Plan administration.* The Mendocino County Employees' Retirement Association (MCERA) was established by the County of Mendocino on January 1, 1948. MCERA is administered by the Board of Retirement (Board) and governed by the County Employees' Retirement Law of 1937 (California Government Code Section 31450 et. seq.). MCERA is a cost-sharing multiple employer public employee retirement system whose main function is to provide service retirement, disability, death and survivor benefits to the General and Safety (Law Enforcement or Probation) members employed by the County of Mendocino. MCERA also provides retirement benefits to the employee members of the Mendocino County Courts and the Russian River Cemetery District.

The management of MCERA is vested with the Mendocino County Board of Retirement. The Board consists of nine members and one alternate. The County Treasurer is a member of the Board of Retirement by law. Four members are appointed by the Board of Supervisors, one of whom may be a County Supervisor. Two members are elected by the General membership, one member is elected by the Safety membership, and one member is elected by the retired members of the Association. All members of the Board of Retirement serve terms of three years except for the County Treasurer whose term runs concurrent with her term as County Treasurer.

*Plan membership.* At June 30, 2019, pension plan membership consisted of the following:

Retired members or beneficiaries currently receiving benefits	1,552
Vested terminated members entitled to, but not yet receiving benefits <sup>(1)</sup>	515
Active members	<u>1,151</u>
Total	3,218

<sup>(1)</sup> Includes terminated members due a refund of employee contributions.

*Benefits provided.* MCERA provides service retirement, disability, death and survivor benefits to eligible employees. All permanent employees of the County of Mendocino or contracting districts who work at least 32 hours per week become members of MCERA effective on the first day of the pay period following employment (although, employees who are age 60 or older at their date of hire may waive MCERA membership). There are separate retirement plans for General, Safety, and Probation member employees. Any new employees who become members on or after January 1, 2013 are subject to the provisions of California Public Employees' Pension Reform Act of 2013 (PEPRA), California Government Code 7522 et seq. and Assembly Bill (AB) 197.

## SECTION 2: GAS 68 Information for the Mendocino County Employees' Retirement Association

---

General members hired prior to January 1, 2013 are eligible to retire once they attain the age of 50 and have acquired 5 or more years of retirement service credit and 10 years of membership. A member with 30 years of service is eligible to retire regardless of age. A vested member who is age 70 or older is eligible to retire. General members who are first hired on or after January 1, 2013 are eligible to retire once they have attained the age of 52, and have acquired 5 years of retirement service credit, or age 70.

Safety and Probation members hired prior to January 1, 2013 are eligible to retire once they attain the age of 50 and have acquired 5 or more years of retirement service credit and 10 years of membership. A member with 20 years of service is eligible to retire regardless of age. A vested member who is age 70 or older is eligible to retire. Safety and Probation members who are first hired on or after January 1, 2013 are eligible to retire once they have attained the age of 50, and have acquired 5 years of retirement service credit, or age 70.

The retirement benefit the member will receive is based upon age at retirement, final average compensation, years of retirement service credit and retirement plan and tier.

General member benefits are calculated pursuant to the provisions of Section 31676.12<sup>1</sup>. The monthly allowance is equal to 1/50th of final compensation times years of accrued retirement service credit times the age factor from Section 31676.12. General member benefits for those who are first hired on or after January 1, 2013 are calculated pursuant to the provision of California Government Code Section 7522.20(a). The monthly allowance is equal to the final compensation<sup>2</sup> multiplied by years of accrued retirement credit multiplied by the age factor from Section 7522.20(a).

Safety member benefits are calculated pursuant to the provisions of Section 31664.2. The monthly allowance is equal to 3% of final compensation times years of accrued retirement service credit times the age factor from Section 31664.2. Safety member benefits for those who are first hired on or after January 1, 2013 are calculated pursuant to the provision of California Government Code Section 7522.25(d). The monthly allowance is equal to the final compensation multiplied by years of accrued retirement credit multiplied by the age factor from Section 7522.25(d).

Probation member benefits are calculated pursuant to the provisions of Section 31664. The monthly allowance is equal to 1/50th of final compensation times years of accrued retirement service credit times the age factor from Section 31664. Probation member benefits for those who are first hired on or after January 1, 2013 are calculated pursuant to the provision of

---

<sup>1</sup> For members in Bargaining Groups 01 and 101 who have service prior to October 1, 2003 and who have not purchased this service to be covered under Section 31676.12, their prior service will be covered under Section 31676.11 for Tier 1 and Tier 2 and Section 31676.1 for Tier 3. For all other Bargaining groups, the prior service date is January 1, 2002 (instead of October 1, 2003).

<sup>2</sup> California Government Code Section 7522.32(a) states that "Final compensation shall mean the highest average annual pensionable compensation earned by the member during a period of at least 36 consecutive months, or at least three consecutive school years if applicable, immediately preceding his or her retirement or last separation from service if earlier, or during any other period of at least 36 consecutive months, or at least three consecutive school years if applicable, during the member's applicable service that the member designates on the application for retirement."

## **SECTION 2: GAS 68 Information for the Mendocino County Employees' Retirement Association**

---

California Government Code Section 7522.25(d). The monthly allowance is equal to the final compensation multiplied by years of accrued retirement credit multiplied by the age factor from Section 7522.25(d).

For members with membership dates before January 1, 2013, the maximum monthly retirement allowance at retirement is 100% of final compensation.

Final average compensation consists of the highest 12 consecutive months of pay for a General Tier 1, Safety Tier 1, or Probation Tier 1 member, and the highest 36 consecutive months for all other members.

The member may elect an unmodified retirement allowance, or choose an optional retirement allowance. The unmodified retirement allowance provides the highest monthly benefit and a 60% continuance to an eligible surviving spouse or domestic partner. An eligible surviving spouse or domestic partner is someone who is married to or registered with the member one year prior to the effective retirement date. There are two optional retirement allowances the member may choose, that is, Option 1 (cash refund) and Option 2 (100% continuance). Each of the optional retirement allowances requires a reduction in the unmodified retirement allowance in order to allow the member the ability to provide certain benefits to a surviving spouse, domestic partner, or named beneficiary having an insurable interest in the life of the member.

MCERA provides an annual cost-of-living benefit to all non-PEPRA retirees. The cost-of-living adjustment, based upon the Consumer Price Index prepared by the Bureau of Labor Statistics that applies to the West Region, is capped at 3.0%.

The County of Mendocino and contracting districts contribute to the retirement plan based upon actuarially determined contribution rates adopted by the Board of Retirement. Employer contribution rates are adopted annually based upon recommendations received from MCERA's actuary after the completion of the annual actuarial valuation. The average employer contribution rate as of June 30, 2019 for 2018-2019 (based on the June 30, 2017 valuation) was 34.73% of covered payroll.

All members are required to make contributions to MCERA regardless of the retirement plan or tier in which they are included; however, non-PEPRA members with 30 or more years of service are exempt from paying member contributions. The average member contribution rate as of June 30, 2019 for 2018-2019 (based on the June 30, 2017 valuation) was 9.59% of covered payroll.

**SECTION 2: GAS 68 Information for the Mendocino County Employees' Retirement Association**

**EXHIBIT 2**

**Net Pension Liability**

<b>Reporting Date for Employer under GAS 68</b>	<b>June 30, 2020</b>	<b>June 30, 2019</b>
<b>Measurement Date for Employer under GAS 68</b>	<b>June 30, 2019</b>	<b>June 30, 2018</b>
The components of the Net Pension Liability are as follows:		
Total Pension Liability	\$747,481,137	\$717,925,244
Plan's Fiduciary Net Position	<u>532,727,019</u>	<u>520,429,961</u>
Net Pension Liability	\$214,754,118	\$197,495,283
Plan's Fiduciary Net Position as a percentage of the Total Pension Liability	71.3%	72.5%

The Net Pension Liability was measured as of June 30, 2019 and 2018. The Plan's Fiduciary Net Position was valued as of the measurement date, while the Total Pension Liability was determined based upon the results of the actuarial valuations as of June 30, 2019 and 2018, respectively. Note, however, that the calculation of the TPL measured as of June 30, 2019 is slightly different than the calculation of the Actuarial Accrued Liability (AAL) in the actuarial funding valuation as of June 30, 2019.<sup>3</sup>

*Plan provisions.* The plan provisions used in the measurement of the NPL as of June 30, 2019 and 2018 are the same as those used in the MCERA funding valuations as of June 30, 2019 and 2018, respectively.

*Actuarial assumptions.* The Total Pension Liability as of June 30, 2019 and 2018 were determined by actuarial valuations as of June 30, 2019 and June 30, 2018, respectively. The actuarial assumptions used in this June 30, 2019 valuation (and in the 2018 valuation) were based on the results of an experience study for the period from July 1, 2013 through June 30, 2016. They are the same as the assumptions used in the June 30, 2019 funding actuarial valuation for MCERA. The assumptions are outlined in Section 3 of this report. In particular, the following actuarial assumptions were applied to all periods included in the measurement:

Inflation	3.00%
Salary increases	Ranges from 8.50% to 4.00% based on years of service, including inflation
Investment rate of return	7.00%, net of pension plan investment expense, including inflation
Other assumptions	Same as those used in the June 30, 2019 actuarial valuation

<sup>3</sup> For the actuarial funding valuation, the Normal Cost and the Actuarial Accrued Liability are determined as if the current benefit accrual rate had always been in effect.

## SECTION 2: GAS 68 Information for the Mendocino County Employees' Retirement Association

---

### EXHIBIT 3

#### Target Asset Allocation

---

The long-term expected rate of return on pension plan investments was determined using a building-block method in which expected future real rates of return (expected returns, net of inflation) are developed for each major asset class. These returns are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation and subtracting expected investment expenses and a risk margin. The target allocation and projected arithmetic real rates of return for each major asset class, after deducting inflation, but before deducting investment expenses are summarized below. These values were used in the derivation of the long-term expected investment rate of return assumption for the actuarial valuations as of June 30, 2019 and 2018. This information is subject to change every three years based on an actuarial experience study.

<b>Asset Class</b>	<b>Target Allocation</b>	<b>Long-Term (Arithmetic) Expected Real Rate of Return</b>
U.S. Large Cap Equity	25.3%	5.64%
U.S. Small Cap Equity	12.7%	6.24%
Global ex-US Equity	29.0%	6.70%
Broad US Fixed Income	22.0%	1.06%
Real Estate	<u>11.0%</u>	4.37%
<b>Total</b>	100.0%	

*Discount rate:* The discount rate used to measure the TPL was 7.00% as of June 30, 2019 and June 30, 2018. The projection of cash flows used to determine the discount rate assumed plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the actuarially determined contribution rates. For this purpose, only employee and employer contributions that are intended to fund benefits for current plan members and their beneficiaries are included. Projected employer contributions that are intended to fund the service costs of future plan members and their beneficiaries, as well as projected contributions from future plan members, are not included. Based on those assumptions, the pension Plan's Fiduciary Net Position was projected to be available to make all projected future benefit payments for current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the TPL as of both June 30, 2019 and June 30, 2018.

**SECTION 2: GAS 68 Information for the Mendocino County Employees' Retirement Association**

---

**EXHIBIT 4**

**Discount Rate Sensitivity**

---

*Sensitivity of the Net Pension Liability to changes in the discount rate.* The following presents the NPL of MCERA as of June 30, 2019, which is allocated to all employers, calculated using the discount rate of 7.00%, as well as what MCERA's NPL would be if it were calculated using a discount rate that is 1-percentage-point lower (6.00%) or 1-percentage-point higher (8.00%) than the current rate:

<b>Net Pension Liability</b>	<b>1% Decrease (6.00%)</b>	<b>Current Discount Rate (7.00%)</b>	<b>1% Increase (8.00%)</b>
County of Mendocino	\$299,477,959	\$206,708,080	\$130,162,658
Mendocino County Courts	10,506,429	7,338,860	4,711,569
Russian River Cemetery District	<u>1,012,408</u>	<u>707,178</u>	<u>454,011</u>
Total for all Employers	\$310,996,796	\$214,754,118	\$135,328,238

**SECTION 2: GAS 68 Information for the Mendocino County Employees' Retirement Association**

<b>Reporting Date for Employer under GAS 68</b>	<b>June 30, 2020</b>	<b>June 30, 2019</b>
<b>Measurement Date for Employer under GAS 68</b>	<b>June 30, 2019</b>	<b>June 30, 2018</b>
<b>Total Pension Liability</b>		
1. Service cost <sup>(1)</sup>	\$13,422,284	\$12,576,536
2. Interest	49,910,705	47,254,554
3. Change of benefit terms	0	0
4. Differences between expected and actual experience	2,897,805	12,682,464
5. Changes of assumptions	0	0
6. Benefit payments, including refunds of member contributions	<u>-36,674,901</u>	<u>-34,153,672</u>
7. Net change in Total Pension Liability	\$29,555,893	\$38,359,882
8. Total Pension Liability – beginning	<u>717,925,244</u>	<u>679,565,362</u>
9. Total Pension Liability – ending	<u>\$747,481,137</u>	<u>\$717,925,244</u>
<b>Plan's Fiduciary Net Position</b>		
10. Contributions – employer	\$23,702,064	\$20,430,644
11. Contributions – employee	6,544,192	5,996,462
12. Net investment income	19,959,119	45,271,985
13. Benefit payments, including refunds of member contributions	-36,674,901	-34,153,672
14. Administrative expense	-1,233,416	-1,142,175
15. Other	<u>0</u>	<u>0</u>
16. Net change in Plan's Fiduciary Net Position	\$12,297,058	\$36,403,244
17. Plan's Fiduciary Net Position – beginning	<u>\$520,429,961</u>	<u>\$484,026,717</u>
18. Plan's Fiduciary Net Position – ending	\$532,727,019	\$520,429,961
19. Net Pension Liability – ending: (9) – (18)	<u>\$214,754,118</u>	<u>\$197,495,283</u>
20. Plan's Fiduciary Net Position as a percentage of the Total Pension Liability	71.3%	72.5%
21. Covered payroll <sup>(2)</sup>	\$68,254,197	\$64,340,578
22. Plan Net Pension Liability as percentage of covered payroll	314.6%	307.0%

<sup>(1)</sup> The service cost is based on the previous year's valuation, meaning the June 30, 2019 and June 30, 2018 measurement date values are based on the valuations as of June 30, 2018 and June 30, 2017, respectively. Both service costs have been calculated using the assumptions shown on page iv in the June 30, 2018 measurement date column, as there had been no changes in the actuarial assumptions between the June 30, 2017 and June 30, 2018 valuations.

<sup>(2)</sup> Covered payroll represents Compensation Earnable and Pensionable Compensation and is defined as the payroll on which contributions to the pension plan are based.

**SECTION 2: GAS 68 Information for the Mendocino County Employees' Retirement Association**

**EXHIBIT 6**

**Schedule of Employer's Contributions – Last Ten Fiscal Years<sup>(1)</sup>**

<b>Year Ended June 30,</b>	<b>Actuarially Determined Contributions<sup>(2)</sup></b>	<b>Contributions in Relation to the Actuarially Determined Contributions</b>	<b>Contribution Deficiency / (Excess)</b>	<b>Covered Payroll<sup>(3)</sup></b>	<b>Contributions as a Percentage of Covered Payroll</b>
2010	\$9,571,000	Not Disclosed in Prior Funding Valuation Reports	N/A	\$70,384,677	N/A
2011	9,553,955	\$9,553,955	\$0	64,252,118	14.87%
2012	11,811,076	11,811,076	0	56,291,191	20.98%
2013	14,260,473	14,260,473	0	53,254,876	26.78%
2014	14,324,752	14,324,752	0	53,813,882	26.62%
2015	15,164,044	15,164,044	0	54,891,785	27.63%
2016	19,129,191	19,129,191	0	57,407,928	33.32%
2017	19,116,426	19,116,426	0	59,801,480	31.97%
2018	20,430,644	20,430,644	0	64,340,578	31.75%
2019	23,702,064 <sup>(4)</sup>	23,702,064 <sup>(4)</sup>	0	68,254,197	34.73%

See accompanying notes to this schedule on next page.

<sup>(1)</sup> Information prior to 2011 has been extracted from the previous actuary's past valuation reports.

<sup>(2)</sup> Prior to year ending June 30, 2014, this amount was the Annual Required Contribution (ARC).

<sup>(3)</sup> Covered payroll represents Compensation Earnable and Pensionable Compensation and is defined as the payroll on which contributions to the pension plan are based.

<sup>(4)</sup> As referenced on page 6 of the June 30, 2019 funding valuation report, this amount includes additional UAL contributions made by the Mendocino County Superior Court and the Russian River Cemetery District during FY 2018/2019 based on the minimum dollar UAAL amortization amount for FY 2017/2018. We understand that the Mendocino County Superior Court and the Russian River Cemetery District had paid \$31,288 and \$5,949 less than the minimum UAAL contributions in FY 2017/2018, respectively.

## SECTION 2: GAS 68 Information for the Mendocino County Employees' Retirement Association

---

### Notes to Exhibit 6

---

#### Methods and assumptions used to establish "actuarially determined contribution" (ADC) rates:

<b>Valuation date</b>	Actuarially determined contribution rates are calculated as of June 30, two years prior to the end of the fiscal year in which contributions are reported
<b>Actuarial cost method</b>	Entry Age Cost Method (individual basis)
<b>Amortization method</b>	Level percent of payroll for total unfunded liability
<b>Remaining amortization period</b>	Prior to July 1, 2012, the total UAAL was being amortized on a 30-year decreasing period, with 27 years remaining as of June 30, 2012 (and 20 years remaining as of June 30, 2019). On or after July 1, 2012, any new UAAL resulting from plan amendments are amortized over separate decreasing 15-year periods; early retirement incentive programs (ERIPs) are amortized over separate decreasing 5-year periods; assumption and method changes are amortized over separate decreasing 18-year periods; and experience gains/losses are also amortized over separate decreasing 18-year periods.
<b>Asset valuation method</b>	Market Value of Assets less unrecognized returns in each of the last five years. Unrecognized return is equal to the difference between the actual market return and the expected return on the market value, and is recognized over a five year period, further adjusted, if necessary, to be within 25% of the market value. The Valuation Value of Assets is the Actuarial Value of Assets reduced by the value of the non-valuation reserves.
<b>Actuarial assumptions:</b>	<u>June 30, 2017 (for the year ended June 30, 2019 ADC)</u>
Investment rate of return	7.00%
Inflation rate	3.00%
Real across-the-board salary increase	0.50%
Projected salary increases*	Ranges from 8.50% to 4.00%, based on years of service
Cost of living adjustments	3.00% of retirement income for General Tiers 1, 2, and 3, Safety Tiers 1 and 2, and Probation Tiers 1 and 2
Mortality (Post-Retirement)	Healthy: Headcount-Weighted RP-2014 (RPH-2014) Healthy Annuitant Mortality Tables, set back one year for males and set forward one year for females, projected 20 years with the two-dimensional mortality improvement Scale MP-2016
Other assumptions	Same as those used in the June 30, 2017 funding actuarial valuation

\* Includes inflation at 3.00% plus across the board salary increases of 0.50% plus merit and promotion increases that vary by service.

## SECTION 2: GAS 68 Information for the Mendocino County Employees' Retirement Association

---

### EXHIBIT 7 (continued)

#### Determination of Proportionate Share

---

##### Notes:

Based on the July 1, 2017 through June 30, 2018 employer contributions as provided by MCERA.

The NPL for each membership class is the TPL minus the Plan's Fiduciary Net Position. The Total Pension Liability for each membership class is obtained from internal valuation results. The Plan's Fiduciary Net Position for each membership class was estimated by adjusting the valuation value of assets for each membership class by the ratio of the total MCERA Plan's Fiduciary Net Position to total MCERA valuation value of assets.

The Safety and Probation membership classes have only one employer (the County), so all of the NPL for Safety and Probation is allocated to the County.

For the General membership class, the NPL is allocated based on the actual employer contributions within that membership class. The steps used for the allocation are as follows:

- First calculate the ratio of the employer's contributions to the total contributions for the membership class.
- This ratio is multiplied by the NPL for the membership class to determine the employer's proportionate share of the NPL for the membership class.

If the employer is in several membership classes, the employer's total allocated NPL is the sum of its allocated NPL from each membership class. The proportionate share of total plan NPL is then the ratio of the employer's total allocated NPL to the total NPL of all employers.

For purposes of the above results, the reporting date for the employer under GAS 68 is June 30, 2019. The reporting date and measurement date for the plan under GAS 67 are June 30, 2018. Consistent with the provisions of GAS 68, the assets and liabilities measured as of June 30, 2018 are not adjusted or "rolled forward" to the June 30, 2019 reporting date. Other results, such as the total deferred inflows and outflows, would also be allocated based on the same proportionate shares determined above.

The following items are allocated based on the corresponding proportionate share within each membership class:

- 1) Net Pension Liability
- 2) Service cost
- 3) Interest on the Total Pension Liability
- 4) Expensed portion of current-period difference between expected and actual experience in the Total Pension Liability
- 5) Expensed portion of current-period changes of assumptions or other inputs
- 6) Member contributions
- 7) Projected earnings on plan investments
- 8) Expensed portion of current-period differences between actual and projected earnings on plan investments
- 9) Administrative expense
- 10) Recognition of beginning of year deferred outflows of resources as pension expense
- 11) Recognition of beginning of year deferred inflows of resources as pension expense

## SECTION 2: GAS 68 Information for the Mendocino County Employees' Retirement Association

---

### EXHIBIT 7 (continued)

#### Determination of Proportionate Share

---

##### Notes:

Based on the July 1, 2018 through June 30, 2019 employer contributions as provided by MCERA.

The NPL for each membership class is the TPL minus the Plan's Fiduciary Net Position. The Total Pension Liability for each membership class is obtained from internal valuation results. The Plan's Fiduciary Net Position for each membership class was estimated by adjusting the valuation value of assets for each membership class by the ratio of the total MCERA Plan's Fiduciary Net Position to total MCERA valuation value of assets.

The Safety and Probation membership classes have only one employer (the County), so all of the NPL for Safety and Probation is allocated to the County.

For the General membership class, the NPL is allocated based on the actual employer contributions within that membership class. The steps used for the allocation are as follows:

- First calculate the ratio of the employer's contributions to the total contributions for the membership class.
- This ratio is multiplied by the NPL for the membership class to determine the employer's proportionate share of the NPL for the membership class.

If the employer is in several membership classes, the employer's total allocated NPL is the sum of its allocated NPL from each membership class. The proportionate share of total plan NPL is then the ratio of the employer's total allocated NPL to the total NPL of all employers.

For purposes of the above results, the reporting date for the employer under GAS 68 is June 30, 2020. The reporting date and measurement date for the plan under GAS 67 are June 30, 2019. Consistent with the provisions of GAS 68, the assets and liabilities measured as of June 30, 2019 are not adjusted or "rolled forward" to the June 30, 2020 reporting date. Other results, such as the total deferred inflows and outflows, would also be allocated based on the same proportionate shares determined above.

The following items are allocated based on the corresponding proportionate share within each membership class:

- 1) Net Pension Liability
- 2) Service cost
- 3) Interest on the Total Pension Liability
- 4) Expensed portion of current-period difference between expected and actual experience in the Total Pension Liability
- 5) Expensed portion of current-period changes of assumptions or other inputs
- 6) Member contributions
- 7) Projected earnings on plan investments
- 8) Expensed portion of current-period differences between actual and projected earnings on plan investments
- 9) Administrative expense
- 10) Recognition of beginning of year deferred outflows of resources as pension expense
- 11) Recognition of beginning of year deferred inflows of resources as pension expense

---

---

**EXHIBIT 9 (continued)**

**Deferred Outflows of Resources and Deferred Inflows of Resources**

---

There are changes in each employer's proportionate share of the total Net Pension Liability during the measurement period ended June 30, 2019. The net effect of the change on the employer's proportionate share of the collective Net Pension Liability and collective deferred outflows of resources and deferred inflows of resources is recognized over the average of the expected remaining service lives of all employees that are provided with pensions through MCERA, which is 2.63 years determined as of June 30, 2018 (the beginning of the measurement period ending June 30, 2019).

In addition, the difference between the actual employer contributions and the proportionate share of the employer contributions during the measurement period ended June 30, 2019 is recognized over the same period.

The average of the expected service lives of all employees is determined by:

- Calculating each active employee's expected remaining service life as the present value of \$1 per year of future service at zero percent interest.
- Setting the remaining service life to zero for each nonactive or retired member.
- Dividing the sum of the above amounts by the total number of active employee, nonactive and retired members.

Net increase (decrease) in pension expense			\$10,078,924	\$8,063,138	\$0	\$0	\$0	\$0	\$0

As described in Exhibit 9, the average of the expected remaining service lives of all employees that are provided with pensions through MCERA (active and inactive employees) determined as of June 30, 2018 (the beginning of the measurement period ending June 30, 2019) is 2.63 years.

Amortization amounts prior to June 30, 2019 have been omitted from this exhibit. These amounts can be found in prior years' GAS 68 reports.

**SECTION 2: GAS 68 Information for the Mendocino County Employees' Retirement Association**

**EXHIBIT 12 (continued)**

**Schedule of Recognition of Changes in Total Net Pension Liability**

**Increase (Decrease) in Pension Expense Arising from the Recognition of Differences between Projected and Actual Earnings on Pension Plan Investments**

Reporting Date for Employer under GAS 68, Year Ended June 30	Differences between Projected and Actual Earnings	Recognition Period (Years)	Reporting Date for Employer under GAS 68, Year Ended June 30:

**SECTION 2: GAS 68 Information for the Mendocino County Employees' Retirement Association**

**EXHIBIT 13**

**Allocation of Changes in Total Net Pension Liability**

In addition to the amounts shown in Exhibit 12, there are changes in each employer's proportionate share of the total Net Pension Liability during the measurement period ending on June 30, 2019. The net effect of the change on the employer's proportionate share of the collective Net Pension Liability and collective deferred outflows of resources and deferred inflows of resources is also recognized over the average of the expected remaining service lives of all employees shown above. The difference between the actual employer contributions and the proportionate share of the employer contributions during the measurement period ending on June 30, 2019 is recognized over the same periods. These amounts are shown below. While these amounts are different for each employer, they sum to zero over the entire Retirement Association.

**Increase (Decrease) in Pension Expense Arising from the Recognition of the Effects of the Change in Proportion and Change in Employer Contributions for the Reporting Date for Employer under GAS 68, Year Ended June 30, 2020**

**SECTION 3: Actuarial Assumptions and Methods and Appendices for the Mendocino County Employees' Retirement Association**

---

---

**Actuarial Assumptions and Methods**

---

**Rationale for Assumptions:** The information and analysis used in selecting each assumption that has a significant effect on this actuarial valuation is shown in the July 1, 2013 through June 30, 2016 Actuarial Experience Study report dated April 14, 2017. Unless otherwise noted, all actuarial assumptions and methods shown below apply to all membership groups (i.e., General, Safety, and Probation) and tiers. These assumptions were adopted by the Board.

**Economic Assumptions:**

**Net Investment Return:** 7.00% per annum, net of investment expenses.

**Employee Contribution Crediting Rate:** 7.00% per annum, compounded semi-annually.

**Consumer Price Index:** Increase of 3.00% per year. Retiree COLA increases due to CPI are subject to a 3% maximum change per year for General Tiers 1, 2, and 3, Safety Tiers 1 and 2, and Probation Tiers 1 and 2 (no COLA increases for General Tier 4, Safety Tier 3, or Probation Tier 3).

**Payroll Growth:** Inflation of 3.00% per year plus real “across the board” salary increases of 0.50% per year.

**Increase in Internal Revenue Code Section 401(a)(17)**

**Compensation Limit:** Increase of 3.00% per year from the valuation date.

**Increase in Section 7522.10**

**Compensation Limit:** Increase of 3.00% per year from the valuation date.

**SECTION 3: Actuarial Assumptions and Methods and Appendices for the Mendocino County Employees' Retirement Association**

---

**Salary Increases:**

The annual rate of compensation includes: inflation at 3.00%, plus “across the board” salary increases of 0.50% per year, plus the following merit and promotion increases:

<b>Years of Service</b>	<b>Merit and Promotion Increases</b>	
	<b>Rate (%)</b>	
	<b>General</b>	<b>Safety and Probation</b>
Less than 1	5.00%	5.00%
1 – 2	3.75%	3.75%
2 – 3	3.50%	3.00%
3 – 4	2.75%	2.25%
4 – 5	2.25%	1.00%
5 – 6	1.75%	0.75%
6 – 7	1.50%	0.75%
7 – 8	1.25%	0.75%
8 – 9	1.00%	0.75%
9 – 10	0.75%	0.75%
10 & Over	0.50%	0.50%

**SECTION 3: Actuarial Assumptions and Methods and Appendices for the Mendocino County Employees' Retirement Association**

**Demographic Assumptions:**

**Post-Retirement Mortality Rates**

*Healthy*

**All Members and All Beneficiaries:** Headcount-Weighted RP-2014 (RPH-2014) Healthy Annuitant Mortality Tables, set back one year for males and set forward one year for females, projected 20 years with the two-dimensional mortality improvement Scale MP-2016.

*Disabled*

**All Members:** Headcount-Weighted RP-2014 (RPH-2014) Healthy Annuitant Mortality Tables, set forward four years for males and set forward six years for females, projected 20 years with the two-dimensional mortality improvement Scale MP-2016.

The above mortality tables contain a margin of about 20%, based on actual to expected deaths, as a provision to reflect future mortality improvement, based on a review of mortality experience as of the measurement date.

**Pre-Retirement Mortality Rates**

**General, Safety, and Probation Members:** Headcount-Weighted RP-2014 (RPH-2014) Employee Mortality Tables, set back one year for males and set forward one year for females, projected 20 years with the two-dimensional mortality improvement Scale MP-2016.

Age	Rate (%)			
	General		Safety and Probation	
	Male	Female	Male	Female
25	0.05	0.02	0.05	0.02
30	0.05	0.02	0.05	0.02
35	0.05	0.03	0.05	0.03
40	0.07	0.05	0.07	0.05
45	0.09	0.08	0.09	0.08
50	0.15	0.13	0.15	0.13
55	0.25	0.19	0.25	0.19
60	0.42	0.28	0.42	0.28
65	0.75	0.42	0.75	0.42

*All General pre-retirement deaths are assumed to be non-service connected deaths. All Safety and Probation pre-retirement deaths are assumed to be service connected deaths.*

**SECTION 3: Actuarial Assumptions and Methods and Appendices for the Mendocino County Employees' Retirement Association**

**Mortality Rates for Member Contributions**

**General Members:** Headcount-Weighted RP-2014 (RPH-2014) Healthy Annuitant Mortality Tables, set back one year for males and set forward one year for females, projected 20 years with the two-dimensional mortality improvement Scale MP-2016, weighted 30% male and 70% female.

**Safety and Probation Members:** Headcount-Weighted RP-2014 (RPH-2014) Healthy Annuitant Mortality Tables, set back one year for males and set forward one year for females, projected 20 years with the two-dimensional mortality improvement Scale MP-2016, weighted 80% male and 20% female.

**Termination Rates Before Retirement:**

Age	Disability Incidence		
	Rate (%)		
	General	Safety	Probation
20	0.01	0.10	0.10
25	0.01	0.13	0.13
30	0.01	0.18	0.18
35	0.02	0.98	0.98
40	0.13	1.65	1.65
45	0.35	1.75	1.75
50	0.51	2.35	2.35
55	0.58	2.75	2.75
60	0.60	0.00	0.00
65	0.63	0.00	0.00

*35% of General disabilities are assumed to be service connected disabilities. The other 65% are assumed to be non-service connected disabilities.*

*95% of Safety and Probation disabilities are assumed to be service connected disabilities. The other 5% are assumed to be non-service connected disabilities.*

**SECTION 3: Actuarial Assumptions and Methods and Appendices for the Mendocino County Employees' Retirement Association**

**Termination Rates Before Retirement (continued):**

Years of Service	Rate (%)		
	Termination (Less Than 5 Years of Service)		
	General	Safety	Probation
Less than 1	22.00	16.00	16.00
1 – 2	16.00	13.00	13.00
2 – 3	14.00	10.00	10.00
3 – 4	13.00	9.00	9.00
4 – 5	12.00	8.00	8.00

*85% of all terminated members with less than 5 years of service are assumed to choose a refund of contributions. The other 15% are assumed to choose a deferred vested benefit. No termination is assumed after a member is eligible for retirement (as long as a retirement rate is present).*

Age	Termination (5+ Years of Service)		
	General	Safety	Probation

70 & Over	100.00	100.00	100.00	100.00	100.00	100.00

*The retirement rates only apply to members that are eligible to retire at the age shown.*

**SECTION 3: Actuarial Assumptions and Methods and Appendices for the Mendocino County Employees' Retirement Association**

---

**Retirement Age and Benefit for Deferred Vested Members:**

General Retirement Age: 60  
Safety and Probation Retirement Age: 55

Deferred vested members who terminate with less than five years of service and are not vested are assumed to retire at age 70 if they decide to leave their contributions on deposit. 60% of future deferred vested members are assumed to continue to work for a reciprocal employer. For reciprocals, 4.00% compensation increases are assumed per annum.

---

**Future Benefit Accruals:**

1.0 year of service per year of employment plus 0.018 years of additional service to anticipate conversion of unused sick leave for each year of employment, for members expected to retire directly from active employment and to receive a service retirement benefit.

**Unknown Data for Members:**

Same as those exhibited by members with similar known characteristics. If not specified, members are assumed to be male.

**Inclusion of Deferred Vested Members:**

All deferred vested members are included in the valuation.

**Form of Payment:**

All active and inactive members are assumed to elect the unmodified option at retirement.

**Percent Married:**

For all active and inactive members, 75% of male members and 50% of female members are assumed to be married at pre-retirement death or retirement.

**Age and Gender of Spouse:**

For all active and inactive members, male members are assumed to have a female spouse who is 2 years younger than the member and female members are assumed to have a male spouse who is 2 years older than the member.

---

**Actuarial Funding Policy:**

**Actuarial Cost Method:**

Entry Age Cost Method. Entry Age is the age on the valuation date minus years of service. Normal Cost and Actuarial Accrued Liability are calculated on an individual basis and are based on costs allocated as a level percentage of compensation.

**SECTION 3: Actuarial Assumptions and Methods and Appendices for the Mendocino County Employees' Retirement Association**

---

<b>Actuarial Value of Assets:</b>	Market value of assets (MVA) less unrecognized returns in each of the last five years. Unrecognized return is equal to the difference between the actual market return and the expected return on the market value, and is recognized over a five-year period. The actuarial value of assets (AVA) is limited by a 25% corridor; the AVA cannot be less than 75% of MVA, nor greater than 125% of MVA.
<b>Valuation Value of Assets:</b>	The Actuarial Value of Assets reduced by the value of the non-valuation reserves.
<b>Amortization Policy:</b>	<p>Prior to July 1, 2012, the total UAAL was being amortized on a 30-year decreasing period, with 27 years remaining as of June 30, 2012 (and 20 years remaining as of June 30, 2019).</p> <p>On or after July 1, 2012, any new UAAL resulting from plan amendments are amortized over separate decreasing 15-year periods; early retirement incentive programs (ERIPs) are amortized over separate decreasing 5-year periods; assumption and method changes are amortized over separate decreasing 18-year periods; and experience gains/losses are also amortized over separate decreasing 18-year periods.</p>
<b>Expected Remaining Service Lives:</b>	<p>The average of the expected service lives of all employees is determined by:</p> <ul style="list-style-type: none"><li>• Calculating each active employee's expected remaining service life as the present value of \$1 per year of future service at zero percent interest</li><li>• Setting the remaining service life to zero for each nonactive or retired member.</li><li>• Dividing the sum of the above amounts by the total number of active employee, nonactive and retired members.</li></ul>

**SECTION 3: Actuarial Assumptions and Methods and Appendices for the Mendocino County Employees' Retirement Association**

**APPENDIX A**

**Calculation of Discount Rate as of June 30, 2019  
Projection of Pension Plan's Fiduciary Net Position (\$ in millions)**

Year Beginning July 1,	Projected Beginning Plan Fiduciary Net Position (a)	Projected Total Contributions (b)	Projected Benefit Payments (c)	Projected Administrative Expenses (d)	Projected Investment Earnings (e)	Projected Ending Plan Fiduciary Net Position (f) = (a) + (b) - (c) - (d) + (e)
2018	\$520	\$30	\$37	\$1	\$20	\$533
2019	533	29	42	1	37	555
2020	555	29	43	1	38	578
2021	578	28	45	1	40	599
2022	599	28	47	1	41	620
2023	620	28	49	1	42	640
2024	640	28	51	2	44	659
2025	659	28	54	2	45	677
2026	677	29	56	2	46	695
2027	695	29	58	2	47	712
2043	749	5 *	72	2	50	729
2044	729	4 *	72	2	48	708
2045	708	4 *	71	2	47	687
2046	687	4 *	70	2	46	666
2047	666	4 *	68	2	44	644
2092	731	2 *	1	2	51	781
2093	781	2 *	0 **	2	55	835
2094	835	2 *	0 **	2	58	894
2095	894	2 *	0 **	2	63	956
2096	956	2 *	0 **	2	67	1,023
2121	5,187	12 *	0 **	12	363	5,550
2122	5,550					
2122	Discounted Value:	5 ***				

\* Mainly attributable to employer contributions to fund each year's annual administrative expenses.

\*\* Less than \$1 million, when rounded.

\*\*\* \$5,550 million when discounted with interest at the rate of 7.00% per annum has a value of \$5 million (or 0.98% of the Plan's Fiduciary Net Position) as of June 30, 2019.

Note that in preparing the above projections, we have not taken into consideration the one-year delay between the date of the contribution rate calculation and the implementation.

### SECTION 3: Actuarial Assumptions and Methods and Appendices for the Mendocino County Employees' Retirement Association

---

#### APPENDIX A (continued)

#### Calculation of Discount Rate as of June 30, 2019 Projection of Pension Plan's Fiduciary Net Position (\$ in millions)

---

Notes:

- (1) Amounts may not total exactly due to rounding.
- (2) Amounts shown for the year beginning July 1, 2018 row are actual amounts, based on the unaudited financial statements provided by MCERA.
- (3) Years 2028-2042, 2048-2091, and 2097-2120 have been omitted from this table.
- (4) Column (a): Except for the "discounted value" shown for 2122, none of the projected beginning Plan's Fiduciary Net Position amounts shown have been adjusted for the time value of money.
- (5) Column (b): Projected total contributions include employee and employer normal cost contributions based on closed group projections (based on covered active members as of June 30, 2019); plus employer contributions to the unfunded actuarial accrued liability; plus contributions to fund each year's annual administrative expenses reflecting an 18-year amortization schedule. Contributions are assumed to occur halfway through the year, on average.
- (6) Column (c): Projected benefit payments have been determined in accordance with paragraph 39 of GAS Statement No. 67, and are based on the closed group of active, inactive vested, retired members, and beneficiaries as of June 30, 2019. The projected benefit payments reflect the cost of living increase assumptions used in the June 30, 2019 report. In accordance with paragraph 31.b.(1)(e) of GASB Statement No. 67, the long-term expected rate of return on Plan investments of 7.00% was applied to all periods of projected benefit payments to determine the discount rate.
- (7) Column (d): Projected administrative expenses are calculated as approximately 0.24% of the projected beginning Plan Fiduciary Net Position amount. The 0.24% portion was based on the actual fiscal year 2018 - 2019 administrative expenses as a percentage of the beginning Plan Fiduciary Net Position amount as of July 1, 2018. Administrative expenses are assumed to occur halfway through the year, on average.
- (8) Column (e): Projected investment earnings are based on the assumed investment rate of return of 7.00% per annum.
- (9) As illustrated in this Exhibit, the Plan's Fiduciary Net Position was projected to be available to make all projected future benefit payments for current Plan members. In other words, there is no projected 'cross-over date' when projected benefits are not covered by projected assets. Therefore, the long-term expected rate of return on Plan investments of 7.00% per annum was applied to all periods of projected benefit payments to determine the Total Pension Liability as of June 30, 2019 shown earlier in this report, pursuant to paragraph 44 of GASB Statement No. 67.

**SECTION 3: Actuarial Assumptions and Methods and Appendices for the Mendocino County Employees' Retirement Association**

---

---

**APPENDIX B**

**Glossary of Terms**

---

Definitions of certain terms as they are used in Statement 68;<sup>4</sup> the terms may have different meanings in other contexts.

**Active employees**

Individuals employed at the end of the reporting or measurement period, as applicable.

**Actual contributions**

Cash contributions recognized as additions to a pension plan's fiduciary net position.

**Actuarial present value of projected benefit payments**

Projected benefit payments discounted to reflect the expected effects of the time value (present value) of money and the probabilities of payment.

**Actuarial valuation**

The determination, as of a point in time (the actuarial valuation date), of the service cost, total pension liability, and related actuarial present value of projected benefit payments for pensions performed in conformity with Actuarial Standards of Practice unless otherwise specified by the GASB.

**Actuarial valuation date**

The date as of which an actuarial valuation is performed.

**Actuarially determined contribution**

A target or recommended contribution to a defined benefit pension plan for the reporting period, determined in conformity with Actuarial Standards of Practice based on the most recent measurement available when the contribution for the reporting period was adopted.

**Ad hoc cost-of-living adjustments (ad hoc COLAs)**

**Cost-of-living adjustments** that require a decision to grant by the authority responsible for making such decisions.

---

<sup>4</sup> The definition for covered payroll is provided in GASB Statement No. 82 (which is an amendment of GASB Statements No. 67 and No. 68).

**SECTION 3: Actuarial Assumptions and Methods and Appendices for the Mendocino County Employees' Retirement Association**

---

---

**APPENDIX B (continued)**

**Glossary of Terms**

---

**Ad hoc postemployment benefit changes**

**Postemployment benefit changes** that require a decision to grant by the authority responsible for making such decisions.

**Agent employer**

An employer whose employees are provided with pensions through an agent multiple-employer defined benefit pension plan.

**Agent multiple-employer defined benefit pension plan (agent pension plan)**

A multiple-employer defined benefit pension plan in which pension plan assets are pooled for investment purposes but separate accounts are maintained for each individual employer so that each employer's share of the pooled assets is legally available to pay the benefits of only its employees.

**Allocated insurance contract**

A contract with an insurance company under which related payments to the insurance company are currently used to purchase immediate or deferred annuities for individual employees. Also may be referred to as an annuity contract.

**Automatic cost-of-living adjustments (automatic COLAs)**

Cost-of-living adjustments that occur without a requirement for a decision to grant by a responsible authority, including those for which the amounts are determined by reference to a specified experience factor (such as the earnings experience of the pension plan) or to another variable (such as an increase in the consumer price index).

**Automatic postemployment benefit changes**

Postemployment benefit changes that occur without a requirement for a decision to grant by a responsible authority, including those for which the amounts are determined by reference to a specified experience factor (such as the earnings experience of the pension plan) or to another variable (such as an increase in the consumer price index).

**Closed period**

A specific number of years that is counted from one date and declines to zero with the passage of time. For example, if the recognition period initially is five years on a closed basis, four years remain after the first year, three years after the second year, and so forth.

**SECTION 3: Actuarial Assumptions and Methods and Appendices for the Mendocino County Employees' Retirement Association**

---

---

**APPENDIX B (continued)**

**Glossary of Terms**

---

**Collective deferred outflows of resources and deferred inflows of resources related to pensions**

Deferred outflows of resources and deferred inflows of resources related to pensions arising from certain changes in the collective net pension liability.

**Collective net pension liability**

The net pension liability for benefits provided through (1) a cost-sharing pension plan or (2) a single-employer or agent pension plan in circumstances in which there is a special funding situation.

**Collective pension expense**

Pension expense arising from certain changes in the collective net pension liability.

**Contributions**

Additions to a pension plan's fiduciary net position for amounts from employers, nonemployer contributing entities (for example, state government contributions to a local government pension plan), or employees. Contributions can result from cash receipts by the pension plan or from recognition by the pension plan of a receivable from one of these sources.

**Cost-of-living adjustments**

Postemployment benefit changes intended to adjust benefit payments for the effects of inflation.

**Cost-sharing employer**

An employer whose employees are provided with pensions through a cost-sharing multiple-employer defined benefit pension plan.

**Cost-sharing multiple-employer defined benefit pension plan (cost-sharing pension plan)**

A multiple-employer defined benefit pension plan in which the pension obligations to the employees of more than one employer are pooled and pension plan assets can be used to pay the benefits of the employees of any employer that provides pensions through the pension plan.

**Covered payroll**

The payroll on which contributions to a pension plan are based.

**SECTION 3: Actuarial Assumptions and Methods and Appendices for the Mendocino County Employees' Retirement Association**

---

---

**APPENDIX B (continued)**

**Glossary of Terms**

---

**Deferred retirement option program (DROP)**

A program that permits an employee to elect a calculation of benefit payments based on service credits and salary, as applicable, as of the DROP entry date. The employee continues to provide service to the employer and is paid for that service by the employer after the DROP entry date; however, the pensions that would have been paid to the employee (if the employee had retired and not entered the DROP) are credited to an individual employee account within the defined benefit pension plan until the end of the DROP period.

**Defined benefit pension plans**

Pension plans that are used to provide defined benefit pensions.

**Defined benefit pensions**

Pensions for which the income or other benefits that the employee will receive at or after separation from employment are defined by the benefit terms. The pensions may be stated as a specified dollar amount or as an amount that is calculated based on one or more factors such as age, years of service, and compensation. (A pension that does not meet the criteria of a defined contribution pension is classified as a defined benefit pension for purposes of Statement 68.)

**Defined contribution pension plans**

Pension plans that are used to provide defined contribution pensions.

**Defined contribution pensions**

Pensions having terms that (1) provide an individual account for each employee; (2) define the contributions that an employer is required to make (or the credits that it is required to provide) to an active employee's account for periods in which that employee renders service; and (3) provide that the pensions an employee will receive will depend only on the contributions (or credits) to the employee's account, actual earnings on investments of those contributions (or credits), and the effects of forfeitures of contributions (or credits) made for other employees, as well as pension plan administrative costs, that are allocated to the employee's account.

**SECTION 3: Actuarial Assumptions and Methods and Appendices for the Mendocino County Employees' Retirement Association**

---

---

**APPENDIX B (continued)**

**Glossary of Terms**

---

**Discount rate**

The single rate of return that, when applied to all projected benefit payments, results in an actuarial present value of projected benefit payments equal to the total of the following:

1. The actuarial present value of benefit payments projected to be made in future periods in which (a) the amount of the pension plan's fiduciary net position is projected (under the requirements of Statement 68) to be greater than the benefit payments that are projected to be made in that period and (b) pension plan assets up to that point are expected to be invested using a strategy to achieve the long-term expected rate of return, calculated using the long-term expected rate of return on pension plan investments.
2. The actuarial present value of projected benefit payments not included in (1), calculated using the municipal bond rate.

**Entry age actuarial cost method**

A method under which the actuarial present value of the projected benefits of each individual included in an actuarial valuation is allocated on a level basis over the earnings or service of the individual between entry age and assumed exit age(s). The portion of this actuarial present value allocated to a valuation year is called the *normal cost*. The portion of this actuarial present value not provided for at a valuation date by the actuarial present value of future normal costs is called the *actuarial accrued liability*.

**Inactive employees**

Terminated individuals that have accumulated benefits but are not yet receiving them, and retirees or their beneficiaries currently receiving benefits.

**Measurement period**

The period between the prior and the current measurement dates.

**Multiple-employer defined benefit pension plan**

A defined benefit pension plan that is used to provide pensions to the employees of more than one employer.

**SECTION 3: Actuarial Assumptions and Methods and Appendices for the Mendocino County Employees' Retirement Association**

---

---

**APPENDIX B (continued)**

**Glossary of Terms**

---

**Net pension liability**

The liability of employers and nonemployer contributing entities to employees for benefits provided through a defined benefit pension plan.

**Nonemployer contributing entities**

Entities that make contributions to a pension plan that is used to provide pensions to the employees of other entities. For purposes of Statement 68, employees are not considered nonemployer-contributing entities.

**Other postemployment benefits**

All postemployment benefits other than retirement income (such as death benefits, life insurance, disability, and long-term care) that are provided separately from a pension plan, as well as postemployment healthcare benefits, regardless of the manner in which they are provided. Other postemployment benefits do not include termination benefits.

**Pension plans**

Arrangements through which pensions are determined, assets dedicated for pensions are accumulated and managed, and benefits are paid as they come due.

**Pensions**

Retirement income and, if provided through a pension plan, postemployment benefits other than retirement income (such as death benefits, life insurance, and disability benefits). Pensions do not include postemployment healthcare benefits and termination benefits.

**Plan members**

Individuals that are covered under the terms of a pension plan. Plan members generally include (1) employees in active service (active plan members) and (2) terminated employees who have accumulated benefits but are not yet receiving them and retirees or their beneficiaries currently receiving benefits (inactive plan members).

**Postemployment**

The period after employment.

**SECTION 3: Actuarial Assumptions and Methods and Appendices for the Mendocino County Employees' Retirement Association**

---

---

**APPENDIX B (continued)**

**Glossary of Terms**

---

**Postemployment benefit changes**

Adjustments to the pension of an inactive employee.

**Postemployment healthcare benefits**

Medical, dental, vision, and other health-related benefits paid subsequent to the termination of employment.

**Projected benefit payments**

All benefits estimated to be payable through the pension plan to current active and inactive employees as a result of their past service and their expected future service.

**Public employee retirement association**

A special-purpose government that administers one or more pension plans; also may administer other types of employee benefit plans, including postemployment healthcare plans and deferred compensation plans.

**Real rate of return**

The rate of return on an investment after adjustment to eliminate inflation.

**Service costs**

The portions of the actuarial present value of projected benefit payments that are attributed to valuation years.

**Single employer**

An employer whose employees are provided with pensions through a single-employer defined benefit pension plan.

**Single-employer defined benefit pension plan (single-employer pension plan)**

A defined benefit pension plan that is used to provide pensions to employees of only one employer.

**SECTION 3: Actuarial Assumptions and Methods and Appendices for the Mendocino County Employees' Retirement Association**

---

---

**APPENDIX B (continued)**

**Glossary of Terms**

---

**Special funding situations**

Circumstances in which a nonemployer entity is legally responsible for making contributions directly to a pension plan that is used to provide pensions to the employees of another entity or entities and either of the following conditions exists:

1. The amount of contributions for which the nonemployer entity legally is responsible is *not* dependent upon one or more events or circumstances unrelated to the pensions.
2. The nonemployer entity is the only entity with a legal obligation to make contributions directly to a pension plan.

**Termination benefits**

Inducements offered by employers to active employees to hasten the termination of services, or payments made in consequence of the early termination of services. Termination benefits include early-retirement incentives, severance benefits, and other termination-related benefits.

**Total pension liability**

The portion of the actuarial present value of projected benefit payments that is attributed to past periods of employee service in conformity with the requirements of Statement 68.

5626093v4/13459.004
