**Subject:** Spyrock Cell Tower

Thanks you for your US mail letter regarding case# UM\_2020-0004. I know the time for pubic comment has passed. The snow has been so deep at my house that I have been unable to get my mail.

I think the idea of a bigger taller tower is great. However, my property borders the tower and I have never been able to get much of a signal off of it. It is apparently an ATT tower, my service is Verizon. My neighbors have the same problem I have. No signals off it.

I know that my comments may be too late for this tower, but I would hope that the BOS or whatever regulatory agency is responsible for cell tower policy could prevail on the company constructing the tower to make it available to everyone in the community regardless of the particular cell company they use. I know there is a lot of opposition to this tower among my neighbors. I think that opposition might lessen radically if they were able to benefit from the tower and not just see it as a health menace and an eyesore.

Thanks,  
Kevin Burke  
4191 Spyrock Rd
