**Subject:** Proposed Tower in Laytonville *UM-2020-0004*

---

Ladies and Gentlemen:

Placing a WiFi tower next to an elementary school would do more damage than you might be aware of, especially to young, developing brains.

Electromagnetic microwave radiation (WiFi), it has now been established beyond doubt. It causes all sorts of damage to living things. In humans, it causes cancer, breaks DNA, causes calcium leakage into cells, interferes with the body's production of melatonin, making sleep a problem, and causes early Alzheimer's, as well as interfering with developing brains in babies and children. The science on this has been well established.

I plead with you to not allow this tower anywhere near a school, playground, or homes where children live.

Thank you very much.
