

Our small farm supports the Round Valley MAC, Mendocino Cannabis Alliance, and Covelo Cannabis Advocacy Group memos. Please help us in protecting our greater Mendocino County and third district communities. We do not want 10% expansion and would like to see funding go to the Sheriff's Code Enforcement department right away to resolve the intolerable amount of crime and violation that is happening in our backyards. We are families, we are local farmers, we are indigneous. We need your help in cleaning up the illegal activities that are happening at an immeasurable rate. Trees are being cut down everyday. Water is being stolen every day. Violence is happening everyday. How can we suggest an expansion with all of the disturbing occurrences that are happening right now? This expansion will worsen every single issue we currently have and there is no one stopping anyone from destruction to our community and environment. Just the idea of expansion that has been going around is already suggesting to these HUGE greenhouse grow operators that they are in the clear to expand. When those of us in the legal market know that it hasn't even been finalized yet. We have seen illegal buildings, greenhouses, bridges, generators and cutting of trees happen in the past year, and everyday for that matter, at such a fast rate it's hard to believe. We need the Planning and Building commissions to put an end to this now. Clean up the mess first, create capped growth, if it's sensible, later. Thank you.
