**Subject:** U-2021-0001 Use Permit

I am interested in all the comments concerning this permit application and would like to ad some things to mine.

In an exchange between CalFre and Ms Kung, she states there is no commercial plans for the large amount of timber harvested. However she has stated to several workers on the property that she planned to build a second cabin which required them to remove the large stumps by backhoe that remained after trees were cut. She is also planting gardens on the cleared property. The entire environment has been completely altered from deep woods to bare earth and non native plants. She doesn't say in her response to CalFire what her plans for the cut timber are or the cleared land ?

I would also like to say that the neighborhood of G Road and nearby Albion Ridge consists of small parcels of under 3 acres, with homes mostly owner occupied by people ranging from 60's to 90's. Even the single renter near by has lived in her house for 35 years, We are retired teachers, nurses, doctors ,real estate professionals, writers, artists ,and local business owners .

We love our neighborhood and value our peace and quiet and the natural beauty that surrounds us. There have been many changes in Albion since I bought my first home here in 1979 .I truly hope this is one that doesn't happen
