Planning & Building Services

Mendocino Planning Commission Members,

I am NOT in favor of yet another cell tower; be it in the shape of a tree or a water tower.

As you are aware, I am not allowed to object to cell towers for health concerns according to the 1996 Tele-Communications Act.

I can and do object to the threat to endangered animals in close proximity to the proposed site.

I also object to the visual inconsistencies this tower would introduce to the landscape.

My hope is that you will deny this plan.

Thank you for your consideration.

Sincerely,

Douglas Burkey
