**Subject:** revised cell tower

I am writing to go on record OPPOSING THE CURRENT APPLICATION FOR A REVISED CELL TOWER.

The proposal , which has been on the table several years now, continues to be in a highly scenic place. The giant water tower is still problematic. I consider The Manchester Beaches among our more "untouched" and wild, rugged coastline.

It would be an eyesore to this pristine and wild area. The long stretch of coastline with accessible beaches , Stornetta headlands and the Point Arena Lighthouse are all impacted.

I urge you to put a stop to this proposal . Find another location.
