Hi Mark,

Nice chatting with you today.

I cc'd Ree Slocum and Anna Sommers on this email.

Below are my notes from yesterday. Photos and map attached, too

I started at 5630 Westview Rd and headed easterly towards Blackhawk Drive.

Road widths varied from 14-15 feet wide near the client property (5600 Westview) and widened out to roughly 22 feet wide along the ridge near the intersections with Williams Ranch Road and Blackhawk Drive.

The road surface was adequately rocked in most areas, but additional rocking and grading would improve the road surface.

In general, the road conditions were very satisfactory. Recent culvert upgrades were observed. No major erosion features or road failures were observed.

Recommended improvements include additional road base and road surface grading.

Please let me know if you have any questions.

Thanks,

**Kirk Vodopals, EIT**

Hi Kirk

I'm going to reach out to a transportation planner and see if they have any input.
