Hi Jessie,

I wanted to provide a few additional details about DOT's preferences for trash can replacement options. The following are the options in order of preference:

1. Option 3 – Big Belly Element

- a. ADA compliant
- b. Animal resistant
- c. Comes with hands-free foot pedal
- d. Only color option is black

2. Option 2 – BearSaver Bear and Rodent Resistant Cart Garage with Chute

- a. ADA compliant
- b. Animal resistant
- c. Can add hands-free foot pedal option
- d. Potential colors in order of preference: black, brown, fir green

3. Option 1 – BearSaver Bear Resistant Cart Garage

- a. Animal resistant
- b. Potential colors in order of preference: black, brown, fir green

I am not sure if this is possible but, ideally, MHRB would approve Option 3 and Option 2 to allow for some flexibility in implementation. I have done my due diligence in researching the options but sometimes unanticipated issues come up during implementation and some flexibility in options would be ideal.

Best,

Amber Fisette
