Dear Ms. Gonzalez-Thies,

I would like to make a comment on Agenda Item MHRB 2015-0009 re the replacement of public trash receptacles in Mendocino.

First of all, I see no need to replace the existing trash receptacles which appear to be doing their job.

Second, three new types of receptacles have been proposed by the Department of Transportation. In my opinion these new receptacles are completely inappropriate in a historic preservation area. They are totally modern in design and would stand out like the proverbial sore thumbs in our village.

I would urge the Board to reject this proposed replacement of trash receptacles.

Sincerely,

Holm Kappler  
Former member of the MHRB
